Bella Musica Academy Newsletter 760-554-6103

March 2015

Got Apps?

There are so many apps now that reinforce music concepts while being fun enough to engage a child. We have tested a few and these are current favorites.

Flashnote Derby for iPhone, iPad

Fun *****

Music value *****

Flashnote Derby is flashcards on a horse race course. The faster you answer correctly, the faster your horse runs! Great range of notes for both hands, or only one. Beginning students can race with only the new notes they've learned, reinforcing success. Easy to set up and fun to play, a great way to improve note reading.

Noteworks for iPhone, iPad

Fun****

Music value*****

Munchy catches each note as you play it. Notes are scrolling on a staff, so look like real music and your notes are part of a song that is playing. Points are gained for number correct and speed.

Reinforces note recognition and sight reading skills.

The free version works great for a beginner with 5 notes on treble staff. Paid version includes both staves, all key signatures, and ledger line notes.

It's not too late to sign up for Guitar Lessons! We have just a few openings remaining. Register now and receive your first book free plus priority registration for next year! Call Today!

Welcome New Students!
